Who We Are

Luma is a learning and instructional design company that is revolutionizing CDL driver training through Luma's Entry-Level Driver Training (ELDT) eNugget® Solution.

We help training schools/colleges engage their drivers during ELDT programs by providing individualized instruction that makes learning easier and facilitates better retention.

Who We Help

Driver training schools/colleges choose Luma's ELDT eNugget® Solution when they:

- Understand that a one-size-fits-all approach to ELDT isn't the best way for student drivers to learn and RETAIN information
- Recognize that students have attention and cognition limits and want to offer training they can refer back to anytime, anyplace on any device

Students can learn in their native language.

Students who struggle with reading can listen instead.

What We Do

Luma's ELDT eNugget® Solution is interactive and meets the theory portion of the FMCSA requirements for entry-level driver training.

Student drivers are prompted to: **Ask. Explore. Practice.**

What Makes Luma's ELDT eNugget® Solution Better for Students?

With Luma's ELDT eNugget® Solution students can:

Search, listen, read, or watch, and have the content translated into their native language

Take practice questions to test their understanding of the material in a game-like environment and see where they rank on a leaderboard

Revisit content as often as they want on any device, making it an indispensable on-demand reference tool
